

CONCENTRA HOSTS CUSTOMER APPRECIATION BARBEQUE AT PHILADELPHIA AIRPORT AREA MEDICAL CENTER

Philadelphia City Councilmen Jack Kelly and Frank Rizzo Join in as Special Guests

Concentra Medical Centers hosted a Customer Appreciation Barbeque lunch at its Philadelphia Airport Area Medical Center (7000 Holstein Avenue) on Wednesday, August 16, 2006. Representing the City of Philadelphia were special guests Councilman Jack Kelly and Councilman Frank Rizzo, who offered remarks during the event program.

Specializing in occupational healthcare and workers' compensation management services, Concentra also provides minor injury care, drug and alcohol screenings, x-ray and laboratory, pre-employment physicals, DOT mandated services, physical therapy and customized onsite services.

Concentra Medical Centers is the nation's largest healthcare company focusing on occupational healthcare. The company serves more than 5,000 businesses and municipalities across the Mid-Atlantic region. Concentra employs nearly 200 people at thirteen centers in central Pennsylvania, Philadelphia, South Jersey and Delaware.

The Philadelphia Airport Area Medical Center is Concentra's newest in the region, as it opened in the fall of 2005. It hosted the Customer Appreciation Barbeque lunch to thank its current customers for their support during its first year of operation, and to introduce new people to Concentra and its services. Guests were treated to a barbeque lunch and many toured the facility.

"The barbeque was a great venue to thank our guests and educate them about Concentra's services," said Vincent Marsico, Concentra Area Sales Manager. "Concentra has a proven track record locally and nationally for delivering quality healthcare while lowering the cost of occupational healthcare for government, business and industry. As a lifelong Philadelphia resident, I am proud that Concentra meets this need for our region."

Some of the amenities offered by the Philadelphia Airport Area Medical Center are: efficient case closure and results, competitive pricing, convenience to the airport, easy access to public transportation, no appointments necessary, effective doctor-company communication, automatic fax or e-mail of a status report at the time of patient checkout, short waiting times for injured employees, van service for transportation of all new injuries, 24-hour on-call service and premier customer service.

Concentra provides occupational healthcare services to more than 136,000 employer locations and over 3,700 insurance companies, health plans, third-party administrators, and government agencies nationwide. In 2004, the company recorded more than 5.9 million patient visits.
