Chadds Ford, PA September 1, 2006 - Radius Systems, a building automation systems integration and energy management specialist located in Southeastern PA is pleased to announce we have become an authorized dealer for the Automated Logic Corporation (www.automatedlogic.com) product line for the geographic regions of Southeastern Pennsylvania, Southern New Jersey, and Delaware.

The Automated Logic product line is based on the ASHRAE BACnet open communication platform, and has a full line of products designed to monitor and control your building's environment, including HVAC, lighting, energy management, smoke evacuation, and 3rd party system integration (fire, security, power, etc.). ALC's products are unparalleled in their inherent integration capability, ease of use, and non-proprietary nature. Interface to the system is performed via WebCTRL, Automated Logic's internet/intranet based user interface that is accessible via a standard web browser, yet provides full access to system graphics, reports, alarms, trend logs, and system software.

ALC also offers 21 CFR Part 11 compliance with WebCTRL for use in FDA validated and GAMP4 environments such as pharmaceuticals, biotech and medical device manufacturing, or other critical manufacturing or research environments.

About Radius

Radius Systems is a turnkey provider of Building Automation and HVAC systems and services in the PA/DE/NJ tri-state region. We are an aggressive, action-oriented, and results-oriented organization dedicated to providing practical and effective solutions to our customers. Our turnkey solutions provide long term outstanding performance of HVAC and building control systems, that is energy and operationally efficient. Our legacy control system evaluation and corrective action services provide you with an independent look at your building HVAC and control systems.
