mindSHIFT Achieves Managed Services Accreditation from MSPAlliance

Rigorous Program Assures Customers, Prospects of mindSHIFT Quality and Reliability

Fairfax, VA — February 13, 2007 —mindSHIFT Technologies, a leading provider of managed IT services, VoIP and professional services, today announced that it has received accreditation under the MSPAlliance's Managed Services Accreditation Program. This accreditation, the first program of its kind, is specifically designed and created to provide customers of managed services providers with the assurance that the MSPs they hire meet or exceed the highest principles of quality.

"As a longtime member of the MSPAlliance, mindSHIFT has been a staunch supporter of best-in-class managed services," said Charles Weaver, MSPAlliance president. "This achievement simply reaffirms that commitment."

MSAP uses numerous criteria--including financial stability, facilities, managed services practices, and customer satisfaction-- to measure and verify an optimal level of professional and business practices, ensuring that the accredited MSPs consistently deliver superior services to their clients.

"Our existing and prospective customers can rest assured that their IT needs are in the hands of a vetted, stable, and professional managed services organization," said Paul Chisholm, Chairman and CEO of mindSHIFT. "They know that we operate at the highest level of stability, reliability and capability."

About mindSHIFT Technologies, Inc.

With operations in Boston, New York, Philadelphia and Washington D.C., mindSHIFT is a leading Managed Services Provider (MSP) offering managed services, VoIP and professional services to small- and medium-sized organizations and law firms. The company's portfolio of managed services provides a comprehensive solution which includes such critical services as email management and administration, electronic backup for servers and desktops, virus and spam protection, desktop support, and server management. Managed services customers are supported by both a 24-hour Network Operations Center for proactive management support and a call center which diagnoses and resolves all end-user desktop issues. For advanced and larger businesses, the company provides business application migrations, storage area network upgrades and complex hosting applications. Additionally, mindSHIFT has superior expertise and experience in meeting the complex demands of the legal community for the integration of applications such as document management.
