Advanced Technology in Action to Solve Today's Business Problems

Collaboration is at the core of business today. Communication and collaboration to and more specifically a collaboration environment, can lead to dramatic increases business value and productivity through both the decrease in IT support requirements and costs as well as more effective business processes by:

- • Connecting people with the right information at the right time and right place
- • Connecting people with fellow employees, vendors, partners or other external contacts outside of the organization
- • Connecting people with the right business processes

Attend This Unique Event for a First-Hand View

Through an in-depth product demonstration and interactive Q&A session, you'll have the opportunity to see first hand how Microsoft's collaboration tools help provide companies like yours with a competitive advantage by:

- • Simplifying and integrating communication options
- • Improving team collaboration and performance
- • Enabling faster, data-driven business decisions

You will also find out about complementary solutions and services available through **Software Logic** to help take your success to the next level.

We look forward to seeing you there!
