

ONLINE TRADING ACADEMY ANNOUNCES GRAND OPENING OF KING OF PRUSSIA/ PHILADELPHIA CAMPUS

Grand Opening Week to Feature Free Power Trading Workshops

Online Trading Academy will celebrate the opening of its Philadelphia campus in King of Prussia in September, 2009. In honor of the facility's Grand Opening, Online Trading Academy will hold several free investor and trader workshops beginning September 24th, 25th, 26th and October 1st, 2nd and 3rd for students from Greater Philadelphia and nearby counties who are looking to gain an increased knowledge of stock, bond, currency, futures and options trading. The new campus is located at 234 Mall Boulevard, Suite 250, King of Prussia, PA 19406.

Catering to both new and experienced active traders and investors, Online Trading Academy provides the powerful knowledge and self-discipline that gives traders logical control over their individual market orders and executions. By utilizing a computer platform known as Direct Access Trading, professional trading instructors and mentors guide eager student/traders through a robust seven-day "live trading" program and unique "lifetime" trader support that ultimately equalizes the playing field between them and the skilled industry pros on the contra side of the trade.

"This is a great opportunity to learn from one of the best," said Eyal Shahar, President of Online Trading Academy. "For anyone who lives in the Philadelphia area and is currently a trader or wants to become one, this is the perfect time to check out our new campus and gain some valuable knowledge at the same time."

Online Trading Academy believes that the best way for students to learn is by actually working in a real trading environment. Students are given "live accounts" on which to work and Online Trading Academy covers all their commissions and losses. Innovations like this and fully reimbursed student tuitions in the form of discounted tickets from affiliated brokers have made Online Trading Academy the pioneering institution in the field of financial education.
