FOR IMMEDIATE RELEASE

Emerio in IAOP's '2009 Global Outsourcing 100' list, fourth time in a row

Singapore – Singapore based Emerio, a premier provider of IT Services and Consulting has been ranked 80th in the 2009 Global Outsourcing 100 rankings by the International Association of Outsourcing Professionals (IAOP). Emerio has the distinction of being featured on the list four years in a row, right from the time the award was incorporated in 2006.

The IAOP ranking is an industry accepted list of the world's best Outsourcing companies and according to IAOP, for a company to be listed, it has to be an outstanding performer in terms of growth rate, client experiences, operation efficiency, business width and depth, as well as management maturity.

"At a time when companies that outsource are scrutinizing their suppliers more closely than ever to ensure they are delivering the high quality, value-added results being sought by customers, The Global Outsourcing 100 and The World's Best Outsourcing Advisors have become even more valuable reference tools for companies seeking to work with the best providers and advisors," said IAOP Chairman Michael Corbett. "The companies named on these lists and sub lists have demonstrated their expertise following a rigorous, independently judged process and represent the tops in the industry."

In spite of the current state of the global economy and the slump in the IT sector in particular, Emerio has gone up 14 notches from their 2008 ranking to reach their current rank in the 2009 list. 'This growth and recognition, in the midst of the global restlessness, is a sign of the strong foundations that our company is based on and the quality of service that we consistently provide to our global clients. This is a morale boost for us and we are grateful to IAOP for this prestigious recognition' Mr. Harish Nim, CEO of Emerio, said.

Emerio's core business area is enhancing the IT delivery capabilities of progressive global and local business houses as well as global IT Service Providers. Emerio manages ongoing support for an organization's IT infrastructure and applications under an agreed Service Level Framework. They help organizations achieve consistent quality and operational cost reductions through optimized service delivery models and process improvements. Emerio also offers cutting edge solutions in the areas of Business Intelligence, Software Services,

and Professional Consulting Services. Today, Emerio is supported by over 1400 employees spread across 14 countries with delivery centers in Malaysia, Singapore, Philippines, Indonesia, Thailand and India.
