

Technology Today For Healthcare Specialists

Tuesday, April 20th, 2010

9:00-12:00PM

Philadelphia Marriot West

111 Crawford Avenue

West Conshohocken PA, 19428

Please join us as Vistacom hosts a special technology seminar for our healthcare partners. We will be bringing in representatives from Visix, MediaSite and Polycom to discuss how their technology can make your facility run more effectively and more efficiently. Hands-on demonstrations of digital signage solutions for directories and way-finding, technology for on-demand information for training and grand rounds, videoconferencing to improve real-time interactive communication. We will also have a demo of the Chief Monitor Wall Workstation. The Workstation provides smooth, fingertip tilt in all directions with monitor swing arm, keyboard swing arm, CPU adapter and wall extrusion which all move independently to preferred position. Perfect for most health-related applications, Chief mounts move with the user providing the most stable, simple-to-use, space-conscious workstations available. Come see one for yourself! Breakfast will be served.

Space is very limited. Please contact Destiny Heimbecker directly if you would like to attend: dheimbecker@vistacominc.com or 800-747-0459
